DIRECTIONS

THREE SIMPLE STEPS

FOR A BETTER LAWN

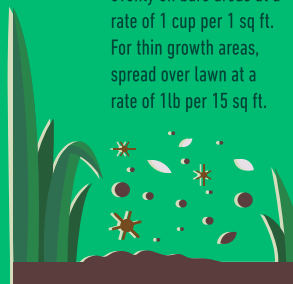

01 PREPARE

Remove debris and lightly break up exposed soil in bare areas. Daytime temperature range should be 60°F -85°F for best results.

02 APPLY

Spread BARE REPAIR evenly on bare areas at a rate of 1 cup per 1 sq ft. For thin growth areas, spread over lawn at a rate of 1lb per 15 sq ft.

03 WATER

Water seeded areas gently 1-2x daily until new grass grows to 2" tall (about 14 days). Keep soil moist, but do not allow water to pool.

Ideal for most grass types including fescue, Kentucky blue grass and perennial rye grass lawns.

STORAGE:

Store in original container, out of reach of children.
